 + 	Stop output to the screen (for long running verbose commands), then use navigation keys  and  to browse
 + 	Allow output to the screen (if previously stopped using command above)
 + 	Send an EOF marker, unless disabled by an option, this will close the current shell (EXIT)
 + 	Send the signal SIGTSTP to the current task, which suspends it. To return to it later enter <i>fg process name</i> (foreground)

## 8 Emacs mode vs Vi mode

Unless otherwise configured Bash is running in the default Emacs setting. If you prefer this can be switched to Vi shortcuts instead. Enable Vi mode in Bash as follows:

```
set -o vi
```

Enable Emacs mode in bash as follows:

```
set -o emacs
```
